

NEVER IDLE

Unlock Peak Efficiency with Automation Suite

John Deere Grader SmartGrade™ technology - automation made easy to keep your attention on the job at hand.

- Auto-Shift PLUS - Shifting made easy. No inching pedal required, brake and throttle only for simplified operations.
- Machine-Damage Avoidance - Limits blade movement to prevent damage to tyres, steps or structures to avoid costly machine damage.
- Auto-Pass - Industry exclusive feature for simplified machine movement. Automatically places the blade on the ground and activates the grade-control system at the start of the pass, then raises and resets the blade at the end of the pass.
- Blade Stow - Prepares the machine for transport with the push of a button, delivering greater simplification for operators.
